And the Coup isn't over. I predict the left
will steal the US Senate majority as well.
Watch Georgia.

We now live in Ameri-Venezuela.

The answer must be to refuse to accept, acknowledge, respect, or obey any of these imposters or their pretend legislation.

.... and get your gear squared away and ready to fight.

That's actually exactly what we need to do,
along with all the other ways of refusing to
bend the knee to an illegitimate usurper
and his pretend legislation.

Think of all our Founding Fathers did to
defy and resist the abuses of King George
and Parliament:

Nullify. Refuse to recognize it as “law”

Boycott.

Refuse to pay the taxes.

Smuggle and circumvent the pretend
legislation.

Tar and feather the tax collector and other officials.

Mass protests.

Build up armed local militia and minuteman companies (something we now see today as well)

Nope. The final defense is us and our rifles.

Trump has a duty to stand, but so far her hasn't. As Roger Stone said.

Trump has one last chance, right now, to stand. But he will need us and our rifles too.

But will he FINALLY act?

Only if WE act and call on him to lead us.

Listen to the video I posted above. That is
the way.

And it has to happen NOW.

You've likely heard this saying:

“You can vote your way into socialism but you have to shoot your way out”.

Well, you didn't even vote your way into socialism.

The socialists stole your way into socialism by stealing the votes.

But the answer is the same.

So will you step up and push Trump to
FINALLY take decisive action?

That's what we must do now. And then if
he still refuses to do his duty, we will still
have to do ours. And we will.

Stewart DC has very tight laws . It will need to be all hand to hand .

You can't even have 9mm ammo in your pocket unless you have a registered 9mm in DC . It's not carry friendly . Less than lethal mace pepper spray and stun guns are Allowed so that's probably the only legal options .
